

Stat-X IMO generator bracket

IMO-Approved Bracket

The reliability of a fire suppression system on board a vessel depends on far more than the performance of the extinguishing agent alone. The mechanical mounting of the aerosol generators is equally critical. Under demanding marine conditions, including continuous vibration, shock, and vessel movement, the generators must remain securely fixed in position at all times. The Stat-X Mounting Bracket Series 345.. has been specifically engineered to provide maximum security under these harsh operating conditions. Its robust design ensures reliable retention of the aerosol generators, making it ideally suited for IMO-compliant marine applications and other environments where dependable performance under extreme mechanical stress is essential.

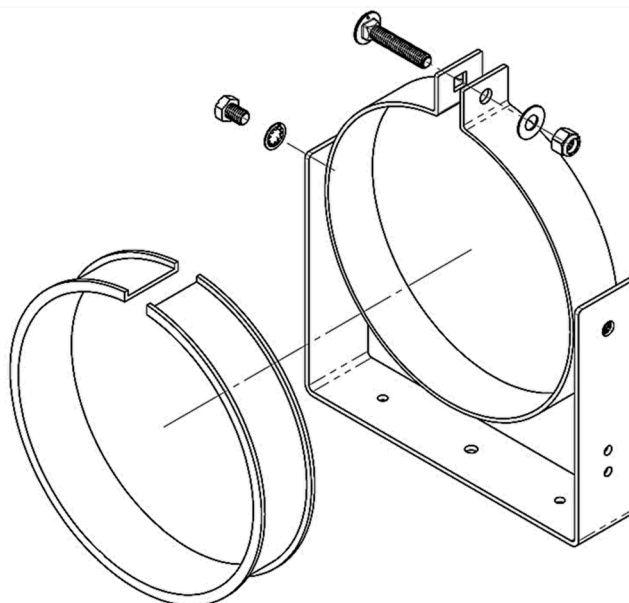

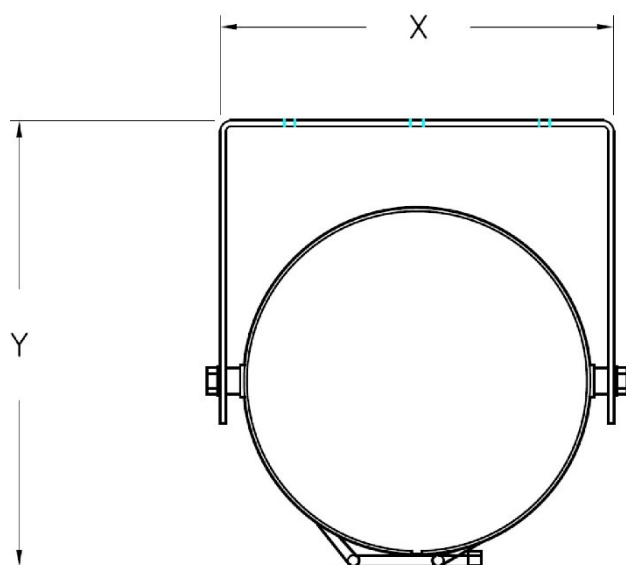

Type	Description	Dimensions Ø	Weight	X size	Y size
KG/34550	Mounting Bracket, 3" Marine 100/250M	3" / 76 mm	0,384 kg	101,6 mm	79,4 mm
KG/34555	Mounting Bracket, 5" Marine 250/500/1000M	5" / 127 mm	0,825 kg	158,5 mm	130.3 mm
KG/34560	Mounting Bracket, 8" Marine 1000/1500/2500	8" / 203 mm	1.75 kg	235,5 mm	177,5 mm

Material:

Stainless Steel AISI 304

Stainless Steel AISI 18-8

Silicone Rubber
